

YOU WILL NEED

A small knife or complete pumpkin carving kit and tape

A pointed guide tool, like a toothpick or pencil, to pierce through the paper stencil and into the pumpkin to form the initial shape

INSTRUCTIONS

Prepare your pumpkin by removing the top and guts.

Prepare your stencil for transfer by adhering it to the face of your pumpkin using standard crafting tape.

Once your stencil is securely taped to your pumpkin, use your pointed tool to poke dotted lines along the outline of the graphic. The dotted lines will act as a guide for carving.

You're ready to carve! Using your small knife or carving kit knife, begin to slowly carve along the transferred outline until complete. And voila! Your NOLS pumpkin is ready for its front porch debut!
